Project Name	Visitor Management System
Maximum Marks	4 Marks

What is an Empathy Map?

An Empathy Map is a collaborative tool used to understand the users of a system by capturing their thoughts, feelings, challenges, needs and goals. It helps us step into the shoes of visitors, hosts, security staff and administrators to design a better Visitor Management System in ServiceNow. The empathy map helps us understand the end users and IT teams who interact with the system.

EMPATHY MAP – Visitor Management System in ServiceNow

★ **Key Insight:** By understanding the needs, pain points and emotions of visitors, hosts, security staff and administrators, our solution focuses on creating a secure, efficient, and seamless visitor management experience in ServiceNow.
